

AXIS is a dynamic data exploration tool

- Save changes directly to the database
- View data fields as entity labels
- Merge Entities
- Integrated interactive multimedia tutorial
- Custom visual indicators (shapes, textures and colors) mapped to data fields
- Supports visual diagrams using maps and photos as backgrounds
- Custom filters find desired entities in the data source
- Share products via web publishing, presentations and printing
- Additional capabilities available when deployed as part of a joint Overwatch Intelligence Center (OIC) system
- Extensible through custom plug-ins
